PAWEŁ KOZŁOWSKI

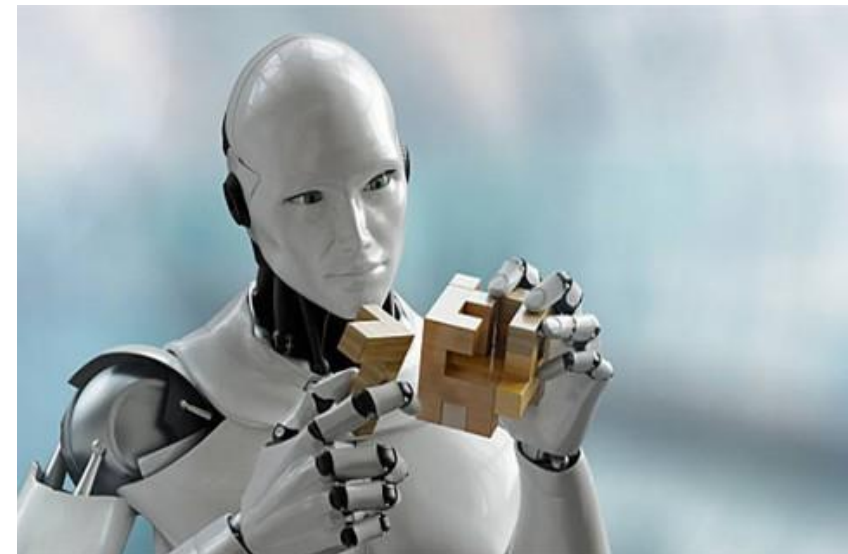

Business type

- ▶ My website focuses on computer science. Together with the entire company, we want to focus on developing robots. In our opinion, robots are the future of the whole world. We are working on an intelligent robot for older people that will help them in their daily activities.

Our website focuses on creating and selling robots.

- ▶ So far there is no official robot for sale. We have the same projects. Several robots are already being tested by specialists. When we finish working on the perfect robot, then we will start selling it. Such a robot will cost 15,000 euros. The price is adequate to the quality of the product. The robot thinks the same and helps you with your daily activities. We sell robots to help others!

Website users

- ▶ Our website is most often visited by family members of older people. A loving family buys a robot for their loved ones to help them with their daily tasks. Hospitals often contact us to have several robots in their inventory.

Our future

- ▶ In the future, we plan to do robots to help the whole family bring meals that are needed in every situation, regardless of its purpose. We plan to send the robot to the moon on a discovery mission. The robot does not need oxygen to breathe so it can be endlessly in space. We want to cooperate with NASA.
